“The Futures BERRY Bright”

We pride ourselves in having highly trained staff, which between us have a great deal of experience across education backgrounds, the fire and police services. Most of our staff are either ex special needs teachers or special needs teaching assistants who specialise in ASC, anxiety disorders, attachment issues, ADHD, Downs syndrome and learning difficulties.

One of our biggest priorities is to ensure that all service users have tailored, person-centred care in place to ensure that all their individual needs are met during their time with us, thus, getting the best out of our clients. By offering outstanding support, we help them work towards their future, giving them the greatest chance of independence as possible.
